

# WLA 2021 Nora Van Burgh Grant

\* Required

## Grant Guidelines and Application

### Grant Conditions:

The monies available for grants will be determined during each budget session of the WLA Executive Board. Typically, no more than \$1,000 in grants are awarded in one year.

Individuals may apply for grants for continuing education activities, workshops, seminars, exchanges, and conferences, as well as for appropriate college and university courses which can be shown to relate directly to one's effectiveness in a library position.

Deadline for applications is Aug. 2nd. Applications may be to support a projected activity or for reimbursement of an activity occurring since July 1 of the previous year.

All money will be awarded at the discretion of the Awards/Grants Committee.

An individual who receives a grant may not apply again for three years.

In order to share the information and experience with the general membership, a written report is required of all grantees, with the understanding that the committee may request an appropriate oral or visual presentation at the WLA annual conference or other place deemed by the committee to be appropriate. The report must be submitted or made available for use by the Awards/Grants Committee within six months of the completion of the event.

Should the conditions of the grant not be met, no further consideration will be given to that individual for any grant or association recommendation.
